

Listing of Claims

1 1. (Previously presented) A necklace, comprising:
2 a first plurality of links, each link of the first plurality having first and second hinge
3 elements that mate with other links and restrict articulation between the links to a first
4 plane; and
5 a second plurality of links, each link of the second plurality having first and second
6 hinge elements that mate with other links and restrict articulation between the links to a
7 second plane, where the second plane is at an angle with respect to the first plane.

2. (Cancelled)

1 3. (Previously presented) A necklace as set forth in claim 1, where
2 the first plane is vertical with respect to the first plurality of links; and
3 the second plane is horizontal with respect to the second plurality of links.

1 4. (Previously presented) A necklace as set forth in claim 1, further
2 comprising means for connecting the first plurality of links to the second plurality of links.

1 5. (Previously presented) A necklace as set forth in claim 4, where the
2 means for connecting the first plurality of links to the second plurality of links comprises an
3 interconnecting link comprising:
4 a first hinge element enables articulation in the first plane; and
5 a second hinge element enables articulation in the second plane, where the second
6 plane is at an angle with respect to the first plane.

1 6. (Previously presented) A necklace as set forth in claim 5, where
2 the first hinge element of the interconnecting link restricts articulation to the first
3 plane; and
4 the second hinge element of the interconnecting link restricts articulation to the
5 second plane.

1 7. (Previously presented) A necklace as set forth in claim 5, where
2 the first plane is vertical with respect to the interconnecting link; and
3 the second plane is horizontal with respect to the interconnecting link.

1 8. (Previously presented) A link for a necklace, comprising first and second
2 hinge elements that mate with other links, where the first and second hinge elements
3 restrict articulation of adjacent links to a plane horizontal with respect to the link.

9-11. (Cancelled)

1 12. (Previously presented) An interconnecting link for connecting a first
2 plurality of links to a second plurality of links in a necklace, comprising:
3 a first hinge element restricting articulation to a first plane; and
4 a second hinge element restricting articulation to a second plane, where the second
5 plane is at an angle with respect to the first plane.

13. (Cancelled)

1 14. (Previously presented) An interconnecting link as set forth in claim 12,
2 where
3 the first plane is vertical with respect to the interconnecting link; and
4 the second plane is horizontal with respect to the interconnecting link.

1 15. (Previously presented) A necklace, comprising:
2 a first plurality of links, each link of the first plurality having first and second hinge
3 elements that mate with other links and restrict articulation between the links to a plane
4 vertical with respect to the links;
5 a second plurality of links, each link of the second plurality having first and second
6 hinge elements that mate with other links and restrict articulation between the links to a
7 plane horizontal with respect to the links; and
8 interconnecting links for connecting the first plurality of links to the second plurality
9 of links, the interconnecting links comprising
10 a first hinge element restricting articulation to the vertical plane; and
11 a second hinge element restricting articulation to the horizontal plane.
